Response to Office Action

Customer No. 01933

**Listing of Claims**

1. (Currently Amended) A communication device comprising:  
mail creation means for creating an electronic mail;  
detecting means for detecting a current position of the  
communication device;

5 storing means for storing regional image information  
specific to areas, said regional image information comprising  
images specific to the areas; and

10 transmission means for reading from the storing means the  
regional image information, comprising at least one of the  
images, corresponding to the area of the detected current  
position, and for attaching said regional image information to  
the electronic mail and transmitting the electronic mail with  
said regional image information attached thereto, when the  
communication device is set in an image attachment mode.

Claim 2 (Canceled).

3. (Currently Amended) The device according to claim 1,  
wherein said storing means stores at least one of scenic images  
of areas, logo marks of areas, and advertisement images  
corresponding to areas as said regional image information.

Customer No. 01933

4. (Previously Presented) The device according to claim 1,  
wherein said storing means comprises a read-only memory.

5. (Previously Presented) The device according to claim 1,  
wherein said storing means comprises a rewritable memory and  
means for writing externally supplied information to said  
rewritable memory.

6. (Currently Amended) A radio communication system  
comprising:

a communication terminal; and

a cell station connected to said communication terminal via

5 a radio channel,

wherein said communication terminal comprises:

mail creation means for creating an electronic mail;

detecting means for detecting a current position of the  
communication terminal;

10 storing means for storing regional image information  
specific to areas, said regional image information comprising  
images specific to the areas; and

transmission means for reading from the storing means  
the regional image information, comprising at least one of the  
15 images, corresponding to the area of the detected current  
position, and for attaching said regional image information to

the electronic mail and transmitting the electronic mail with said regional image information attached thereto, when the communication ~~device~~ terminal is set in an image attachment mode.

Claim 7 (Canceled).

8. (Currently Amended) The system according to claim 6, wherein said storing means stores at least one of scenic images of areas, logo marks of areas, and advertisement images corresponding to areas as the regional image information.

9. (Previously Presented) The system according to claim 6, wherein said storing means comprises a read-only memory.

10. (Previously Presented) The system according to claim 6, wherein said storing means comprises a rewritable memory and means for writing externally supplied information to said rewritable memory.

11. (Currently Amended) A radio communication system comprising:

a communication terminal; and

a service center connected to said communication terminal

5 via a radio channel,

Application No. 09/635,011  
Response to Office Action

Customer No. 01933

wherein said communication terminal comprises:

mail creation means for creating an electronic mail;

detecting means for detecting a current position of the communication terminal; and

10 transmission means for attaching position information indicating the current position detected by the detecting means to the electronic mail and transmitting the electronic mail with the position information attached thereto to the service center, and

15 wherein said service center comprises:

storing means for storing regional image information specific to positions of the terminal, said regional image information comprising images specific to the positions of the terminal;

20 reading means for reading from said storing means the regional image information, comprising at least one of the images, corresponding to the position information attached to the electronic mail and attaching the regional image information to the electronic mail; and

25 means for transmitting the electronic mail with the regional image information attached thereto.

Claim 12 (Canceled).

Customer No. 01933

receiving means for receiving electronic mail with image  
5 information attached thereto which is transmitted from another  
device; and

displaying means for displaying the received electronic mail  
and the received image information with the received image  
information superimposed on a part of the received electronic  
10 mail.

22. (Previously Presented) The system according to  
claim 21, wherein the image information comprises one of a scene  
image and a logo mark.
